# NINJA 1100SX ZX1100HSFNN-GY1 FEATURES

## **Smartphone Connectivity**

A Bluetooth chip built into the instrument panel enables riders to connect to their motorcycle wirelessly. Using the smartphone application "RIDEOLOGY THE APP," a number of instrument functions can be accessed, contributing to an enhanced motorcycling experience.

### **Excellent Wind Protection**

Wind protection afforded by the full-fairing bodywork is complemented by a new windshield with four available positions. As before, the windshield is adjustable by hand (without tools).

Complementing the Ninja 1000SX's exhilarating engine character, the quick shifter enables clutchless upshifts and downshifts for seamless acceleration and quick and easy deceleration.

### **Electronic Cruise Control**

Kawasaki's cruise control system allows a desired speed to be maintained with the simple press of a button. Once activated, the rider does not have to constantly apply the throttle. This reduces stress on the right hand when traveling long distances, enabling relaxed cruising and contributing to a high level of riding comfort

# **TFT Colour Instrumentation**

The compact new all-digital TFT colour instrumentation gives the cockpit a high-tech, highgrade appearance. The new meter also offers additional features unavailable on the previous model.

### **Increased Seat Comfort**

The thicker, wider rider and passenger seats deliver increased comfort, facilitating longer hours in the saddle. The rear seat cushion is wider than its base, offering a greater surface area. Furthermore, a host of accessory seat options are available to cater to rider and passenger needs and preference.
