# NINJA 1100SX ZX1100HSFNN-GY1

## FEATURES

### Smartphone Connectivity

A Bluetooth chip built into the instrument panel enables riders to connect to their motorcycle wirelessly. Using the smartphone application "RIDEOLOGY THE APP," a number of instrument functions can be accessed, contributing to an enhanced motorcycling experience.

### Excellent Wind Protection

Wind protection afforded by the full-fairing bodywork is complemented by a new windshield with four available positions. As before, the windshield is adjustable by hand (without tools).

### KQS (Kawasaki Quick Shifter)

Complementing the Ninja 1000SX's exhilarating engine character, the quick shifter enables clutchless upshifts and downshifts for seamless acceleration and quick and easy deceleration.

### Electronic Cruise Control

Kawasaki's cruise control system allows a desired speed to be maintained with the simple press of a button. Once activated, the rider does not have to constantly apply the throttle. This reduces stress on the right hand when traveling long distances, enabling relaxed cruising and contributing to a high level of riding comfort.

## TFT Colour Instrumentation

The compact new all-digital TFT colour instrumentation gives the cockpit a high-tech, highgrade appearance. The new meter also offers additional features unavailable on the previous model.

## Increased Seat Comfort

The thicker, wider rider and passenger seats deliver increased comfort, facilitating longer hours in the saddle. The rear seat cushion is wider than its base, offering a greater surface area. Furthermore, a host of accessory seat options are available to cater to rider and passenger needs and preference.
